

BlockBolt Payment Magento Extension Configuration – A Complete Guide

Setup BlockBolt Payment Plugin in Magento Commerce

Follow these steps to integrate **BlockBolt Payment Gateway** into your Magento store.

Step 1: Login to Magento Admin

1. Open **Magento Admin Dashboard**.
2. Go to **Store > Configuration > Sales > Payment Methods > Other Payment Methods > BlockBolt Crypto Payment**.

The screenshot displays the Magento Admin Dashboard interface. On the left, the 'Stores' sidebar menu is visible, with 'Configuration' and 'STORES' highlighted by red boxes. The main content area shows the 'SALES' configuration page, with 'SALES' and 'Payment Methods' also highlighted by red boxes. The 'Payment Methods' section is expanded, showing 'Blockbolt Crypto Payment' as an available option, which is also highlighted by a red box. The right sidebar contains 'Merchant Location' and 'FEATURED ADOBE PAYMENT SOLUTION' sections, including the Adobe logo and a 'VISA' logo.

Step 2: Configure BlockBolt Checkout

Domain:

Callback URL:

Cancel URL:

Merchant Name	ABB
Chain	Wallet Address
SUI	0x..... <input type="text"/>
Solana	z..... <input type="text"/>
Binance	0x..... <input type="text"/>
BASE	0x..... <input type="text"/>

[Verify Key](#)

- **Enable:** Turn on the BlockBolt extension.
- **Title:** Set the payment method name for users.
- **Show BlockBolt Logo:** Display the logo on the checkout page.
- **Public & Private Keys:**
 - Enter the keys from your **BlockBolt Merchant Dashboard**.
 - If you don't have them, check [BlockBolt Documentation](#).
- **New Order Status:** Set the status for orders processed via BlockBolt.
- **Auto Invoice:** Enable if needed.
- **Applicable Countries:** Choose where BlockBolt checkout is available.
- **Instructions:** Add payment instructions for users.

Step 3: Add Callback URLs

1. Copy the **Callback URLs** from **BlockBolt Settings**.
2. Log in to your **BlockBolt Merchant Dashboard**.
3. Navigate to **Settings > API Endpoint**.
4. Paste the Callback URLs into the respective fields.

Example for Magento Websites:

- Callback: <https://yourdomain.com/blockboltpayment/payment/callback/>
- Cancel: <https://yourdomain.com/blockboltpayment/payment/cancel/>

Step 4: Verify API Keys

- After entering your **Public & Private Keys**, the system verifies them.
- If successful, you will see:

- ✓ **Your BlockBolt Merchant Profile Name**
- ✓ **Linked wallet addresses for receiving payments**

 Your **BlockBolt Payment Gateway** is now integrated with **Magento Commerce!**
