

# How to Get BlockBolt API Key for Your Magento Website

## Step 1: Sign Up

1. Visit the [BlockBolt Merchant Portal](#).
2. Click **Sign Up** and register with your email.
3. Fill in the details and submit the form.
4. Enter the OTP sent to your email for verification.

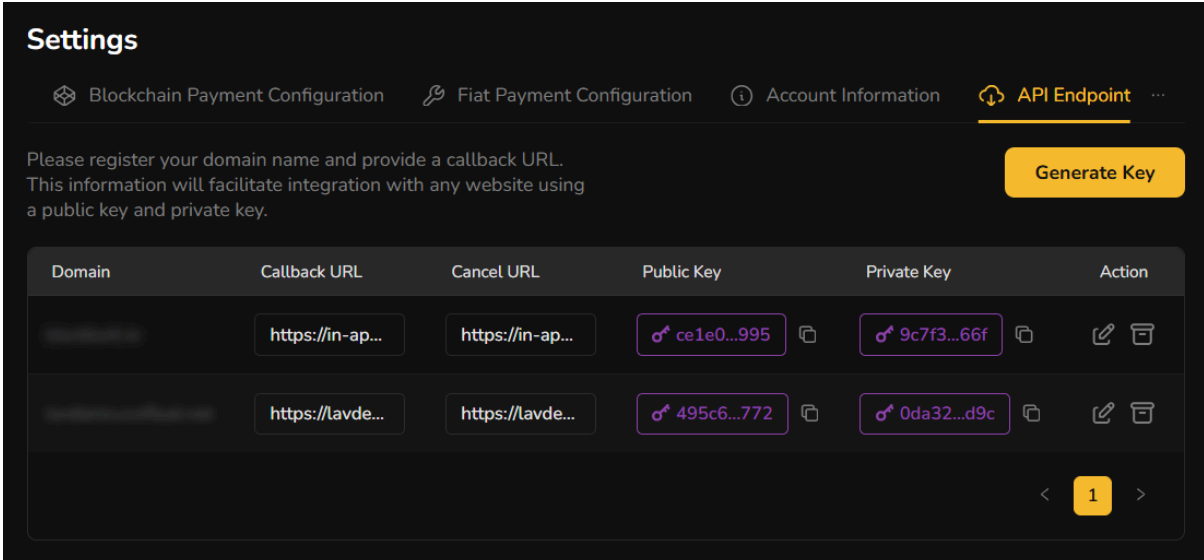

## Step 2: Apply for a Business Account

1. Log in to your merchant account.
2. Go to **Merchant Application**.
3. Fill in the required business details and submit.

## Step 3: Approval

- The BlockBolt team will review your application within **7 business days**.
- You'll receive an email once approved.
- After approval, log in to your **Merchant Dashboard** to proceed.

## Step 4: Generate API Keys

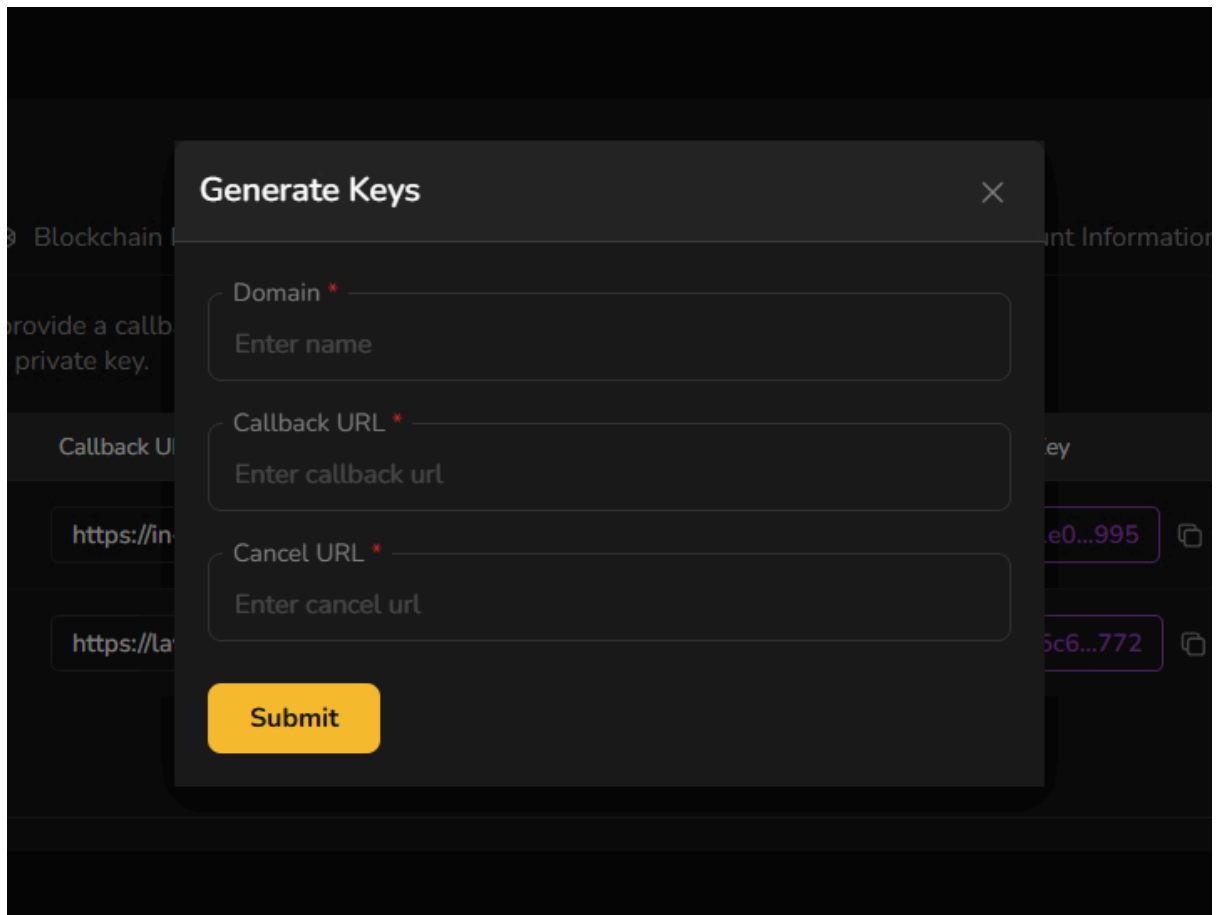

The screenshot shows the 'Settings' page in the BlockBolt Merchant Dashboard, specifically the 'API Endpoint' tab. The page has a dark theme. At the top, there are navigation links: 'Blockchain Payment Configuration', 'Fiat Payment Configuration', 'Account Information', and 'API Endpoint' (which is highlighted with a yellow underline). Below the navigation, there is a text prompt: 'Please register your domain name and provide a callback URL. This information will facilitate integration with any website using a public key and private key.' To the right of this text is a yellow 'Generate Key' button. Below the text is a table with the following columns: 'Domain', 'Callback URL', 'Cancel URL', 'Public Key', 'Private Key', and 'Action'. The table contains two rows of data. The first row shows a domain, a callback URL 'https://in-ap...', a cancel URL 'https://in-ap...', a public key 'ce1e0...995', a private key '9c7f3...66f', and an action icon. The second row shows a domain, a callback URL 'https://lavde...', a cancel URL 'https://lavde...', a public key '495c6...772', a private key '0da32...d9c', and an action icon. At the bottom right of the table, there is a pagination control showing '< 1 >'.

Domain	Callback URL	Cancel URL	Public Key	Private Key	Action
	https://in-ap...	https://in-ap...	ce1e0...995	9c7f3...66f	
	https://lavde...	https://lavde...	495c6...772	0da32...d9c	

1. Log in to your **Merchant Dashboard**.
2. Navigate to **Settings > API Endpoint**.

3. Click **Generate Key** and enter:

A screenshot of a web application interface showing a modal window titled "Generate Keys". The modal has a close button (X) in the top right corner. It contains three input fields, each with a red asterisk indicating a required field: "Domain" with a placeholder "Enter name", "Callback URL" with a placeholder "Enter callback url", and "Cancel URL" with a placeholder "Enter cancel url". Below these fields is a yellow "Submit" button. In the background, parts of other form fields are visible, including "Blockchain", "provide a callb", "private key.", "Callback U", "https://in", "https://la", "e0...995", and "5c6...772".

- **Domain Name** (Your website's domain)
- **Callback URL** (For payment status updates)
- **Cancel URL** (For canceled payments)

#### 4. Example for Magento Websites:

- Callback: <https://yourdomain.com/blockboltpayment/payment/callback/>
- Cancel: <https://yourdomain.com/blockboltpayment/payment/cancel/>

### Step 5: Retrieve API Keys

- **Private Key** (For secure server-side communication)
- **Public Key** (For client-side integration)

Use these keys to integrate **BlockBolt Payment Gateway** into your website.
